

WHAT IS THE SAFETY SMART PROGRAM?

Safety Smart is a lesson-based, multi-lingual global educational program developed by Underwriters Laboratories (UL) in partnership with The Walt Disney Parks and Resorts. The program aims to improve children's awareness and understanding of safety, health, and environmental issues, and ultimately to impact their behavior. Safety Smart utilizes a tested and proven educational methodology that enhances children's behavioral intent to make "safety smart" decisions, thereby helping them manage themselves and their surroundings as safely as possible – by conscious action, not chance. Through its efforts, the Safety Smart program cultivates safety awareness, provides opportunities for children to learn and to practice safe behaviors, and helps children make more informed safety choices today and in the future.

Team 180 S.P.A.M., along with your UL Safety Advisors, invites you to request access to the Safety Smart Training Portal to become an approved SafetySmart Ambassadors and take advantage of all it has to offer.

This portal will give you access to (8) Safety Smart animations featuring Disney's Timon and Pumbaa in 35 languages, as well as our safety science content with Bill Nye the Science Guy®. You will also have access through desktop or mobile devices to all the training materials and Ambassador guides. We encourage you to become an approved Safety Smart Ambassadors so you can mentor your Jr FLL and FLL teams and visit local schools or community groups to help spread the word about safety.

Email elaine.wilder@ul.com to get a login and password for the Safety Smart Training Portal for your team. Please include your team name, team number and the state you live in.
